EDUCATION

Northeastern University, Boston, MA

Sept 2016 – Dec 2018

Master of Science in Computer & Information Sciences

Courses: Algorithms, Parallel Data Processing, Web Development, Managing S/W Development, Information Retrieval, DBMS

Dr. APJ Abdul Kalam Technical University, Lucknow, India

July 2008 – June 2012

Bachelor of Technology in Computer Science and Engineering

Courses: Data Structures, Algorithms, Object Oriented Programming, Web Technology, Operating Systems, Compilers

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, SQL
Web Technologies:	React, Angular, Redux, CSS, Bootstrap, jQuery, Node.js
Frameworks:	Spring, J2EE, REST, Hadoop, Map Reduce, Apache Spark, Hibernate, Mockito
Database:	Snowflake, Oracle 10g, Postgres, MongoDB, IBM DB2, Sybase IQ
Cloud Technologies:	AWS (S3, EMR, EC2, Glue, Lambda)
AI Tools & Frameworks:	Github Copilot, Claude Code, Cursor, Devin
Certifications:	Oracle Certified Professional, Java EE 5 Web Component Developer (2014) Oracle Certified Professional Java SE 6 Programmer (2013)

PROFESSIONAL EXPERIENCE

Goldman Sachs, Jersey City, New Jersey

Vice President

Dec 2022 – Present

- Architected migration of multiple regulatory reporting workflows from legacy ETL architecture to cloud-native AWS Lambda & AWS Glue stack, improving pipeline performance & data quality through authoritative data sourcing – reducing production support cost by more than 70%.
- Architected a reusable, configurable ETL averaging pipeline using AWS Glue, AWS CloudFormation, and Snowflake, processing up to 100M records per quarter cycle and 2 million records daily across 3 data sources, with plug-and-play data source onboarding via configurable group by attributes, balance definitions and periodic which in turn reduced onboarding time of any new dataset by 50%.
- Spearheaded the design and development of a generic reconciliation tool to compare datasets, identify data variances in record counts, and ensure data accuracy. The tool generated alerts to stakeholders in case anomalies were detected.
- Designed and led the development of a tool to enforce maker-checker controls workflow on manually uploaded Topsides data on General Ledger.
- Led production support operations for 150+ regulatory reporting workflows in 40+ FED reports across weekly, monthly, and quarterly cycles, managing the US team members of the globally distributed team across US and India, including support rotation scheduling and issue allocation.
- Acted as Subject Matter Expert (SME) for the support team, providing technical guidance to unblock engineers and driving recurring issues resolution initiatives to systematically reduce production support overhead.
- Partnered with business stakeholders to gather and scope requirements, leading sprint planning and risk identification sessions, and translating business needs into technical solutions.

Technology Associate

Dec 2020 – Dec 2022

- Drove the onboarding of 70+ US and EMEA regulatory reports over a 2.5-year delivery lifecycle by architecting end-to-end data sourcing, transformation, and orchestrating workflows for Axiom, a cloud-based external regulatory reporting platform, serving as one of the primary technical leads.
- Built a high-availability, scalable middleware service using Java and Spring, serving as the central integration layer between all internal applications and the Axiom regulatory reporting platform for triggering and managing report generation workflows.

Technology Analyst

Feb 2019 – Dec 2020

- Designed and developed a Java and Spring-based middleware application as lead developer, streaming 500K+ records daily from an internal database to Workiva WData, a cloud-based external reporting platform, enabling automated generation of multiple regulatory report sections for board review and regulatory submissions, reducing manual effort by 70%.
- Automated more than 5 critical reporting workflows using Spring Batch, replacing manual data processing and publishing pipelines and reducing manual effort by more than 30%.

Technology Summer Analyst

May 2018 – Aug 2018

- Conducted requirement analysis, user interface design, workflow design, and data modeling for a web application aimed at streamlining the Comprehensive Capital Analysis and Review (CCAR) filing process with the Federal Reserve.

Nok Nok Labs, Palo Alto, California

May 2017 – Dec 2017

Software Engineering CO-OP

- Designed a security module for a web-based application using OWASP CSRF Guard framework in Java.
- Designed and developed a pluggable single-sign-on module using JAAS and Reflection API.
- Won Nok Nok Labs Hackathon for developing a biometric Account Recovery module using face and voice recognition.

Citicorp Services India Pvt. Ltd., Pune, India

Feb 2015 – Aug 2016

Assistant Manager (Software Development, Deployment & Testing)

- Contributed to the back-end development of a high net-worth client onboarding application using Java J2EE, delivering API services, database integration, and unit tests as part of a 20+ member development team, reducing client onboarding time by 50%.
- Contributed to the migration of a legacy codebase to a Spring and Maven-based architecture, reducing development effort by 25% and deployment pipeline time by 30%.
- Designed and developed 20+ RESTful Web Services using Spring REST API framework to expose client data across multiple internal systems within Citi.

Accenture Services India Pvt. Ltd., Pune, India

June 2012 – Feb 2015

Software Engineering Analyst (Software Development, Deployment, Regression Testing & Support)

- Contributed to the design, development, and deployment of an Angular front-end and Java back-end Single Page Application (SPA) delivering retail banking functionality for an Italian banking client.
- Developed a utility tool using the Swings API to automate screenshot capture and storage, significantly reducing testing efforts by 40%.

ACADEMIC & PERSONAL PROJECTS

Hungry Cubs – Online Food Ordering Service (React JS, Spring Boot, MySQL)

Plagiarism Detection Tool – For Python files (Angular, Spring Boot, MongoDB, Spring Security, JWT, AspectJ, AWS)

MyMusic Web Application – Social Networking for Music enthusiasts with Music fingerprinting capabilities (MongoDB, NodeJs, Angular)
